

CASE STUDY

BAKEWELL UNDERPASS – SOIL NAILING

CLIENT: McCONNELL DOWELL

12,000m of Soil Nails to Abutment Walls

In one of the largest soil nailing projects of its type in South Australia, DID Piling successfully installed over 1,500 individual soil nails to depths of between 4 and 11m for a total length of over 12,000 lineal metres.

DID Piling worked with the client to identify and resolve several geotechnical issues associated with the soil nailing contract with the installation of numerous test nails to determine optimal locations, depths and techniques.

DID rescheduled work programs at short notice to accommodate client requirements with regard to site access and other trades but still managed to complete the works within the original 9 month contract period.
