

CASE STUDY

CEDAR GROVE WEIR

CLIENT: WISA

Sheet Piling for Control Weir – South East Qld

DID Piling was contracted by the Water Infrastructure Solutions Alliance to undertake sheet piling works to facilitate the construction of a control weir.

In total, over 900 individual sheet piles were installed for a total installed length of over 15,000 metres.

Works included the fabrication of assorted guides and frames to assist in the timely installation of sheets. This \$2,000,000 contract was completed within 6 months, ahead of client requirements.

DID Piling worked closely with the client to address particular geotechnical issues which had the potential to delay completion of the overall project.
