

# CASE STUDY

## HAMILTON ROAD BRISBANE

**CLIENT: FRH**

### **Bridge Piles in Environmentally Sensitive Location**

DID Piling was contracted to install 750mm dia bored concrete piles for two bridge locations on Hamilton Road in the leafy Brisbane suburb of Chermside.

Piles were bored to depths of up to 20m with access tracks and lay-down areas minimised to reduce environmental impact. Works also included minor piling for retaining walls.

DID Piling worked closely with FRH to ensure the project was completed within strict time constraints and safety guidelines.
